

Wellness Progress Report 2014/15

	<u>Goal</u>	<u>Results</u>	<u>Evaluation</u>	<u>Recommendation</u>
Nutrition Education	Research the addition of Harvest of the Month program to elementary sites where eligibility is above 50% free and reduced	Ten elementary sites qualify for Harvest of the Month; one day a month produce is delivered and the teacher gives a 30 minute lesson; cost is approximately \$18 for the produce per class provided by the current Farm to School vendor	Franklin Elementary participates in this program. It is well received by teachers and students and the program will continue next school year.	Harvest of the Month coordinator will contact the other elementary school sites that qualify to see if there is interest in this program for the 2015/16 school year.
Nutrition Promotion	Increase Farm to School produce offerings at breakfast and lunch meal service in all school cafeterias	All 25 sites offered more variety of locally grown produce throughout the school year. New items were apple pears, grapefruit, nectarines and locally grown apples. Items already purchased from Farm to School vendor are oranges, grapes, watermelon, kiwi and strawberries.	Purchases of locally grown produce increased 50% in the 2014/15 school year.	Seek out other local suppliers and investigate procuring locally grown vegetables in the 2015/16 school year.
Nutrition Guidelines	Implementation of new legislation <i>Smart Snacks in Schools</i>	Meet with Parent Teacher Student Association and Student Stores to review changes to competitive food sales, including fundraising during the school day	In the first year of implementation, policy continued to evolve and change. Communication between district and the CDE was useful in resolving concerns and understanding the changes to policy. Child Nutrition Manager attended spring training session in April 2014 and April 2015 to communicate the updates and changes to policy.	To prepare for the 2015/16 school year, meet with Director of the Colton Redlands Yucaipa Regional Occupational Program to review <i>Smart Snacks</i> food requirements for the student stores at the four high schools in Redlands USD. Wellness committee to strategize best way to communicate and educate Principals on competitive food sales during the school day.
